

## Description

Three-layered, light yellow, cadmium-free, high performance PVC film with a gloss surface. Once the active light source is turned off, the film has a very strong and long lasting afterglow. Phosphorescent properties of the film will not be impaired by repeated use. Does not contain radioactive materials.

## Release Liner

89# PE-coated silicone paper

## Adhesive

Clear, solvent polyacrylate, permanent

## Area of Use

For indoor and outdoor marking of emergency exits and dangerous locations. For exterior use, it is recommended that the film be combined with the laminating film ORAGUARD<sup>®</sup> 293.

## Technical Data

<b>Thickness*</b> (without liner and adhesive)	6-mil
<b>Luminous Density*</b>	After 10 min: 35 mcd/m <sup>2</sup> After 60 min: 5 mcd/m <sup>2</sup>
<b>Decay Time</b>	750 min (0.3 mcd/m <sup>2</sup> )
<b>Dimensional Stability</b> (FINAT TM-14)	Adhered to steel, shrinkage 0.008" max
<b>Temperature Resistance</b>	Adhered to aluminum, -40°F to +212°F, no variation
<b>Adhesive Power*</b> (FINAT TM-1, after 24 h, average)	Adhered to stainless steel: 4.11 lb/in
<b>Tensile Strength</b> (DIN EN ISO 527)	Along: Min. 12 MPa Across: Min. 10 MPa
<b>Elongation at Break</b> (DIN EN ISO 527)	Along: Min. 100% Across: Min. 100%
<b>Shelf Life**</b> (68°F/50% relative humidity)	2 years
<b>Minimum Life Expectancy***</b> (based on accepted application procedures on vertical surfaces)	5 years (unprinted)
<b>Minimum Application Temperature</b>	> 46°F
<b>Available Lengths</b> <b>Available Widths</b>	10 meters, 25 meters 54"
<b>Recommended Laminates</b>	ORAGUARD <sup>®</sup> 293
<b>Print Compatibility</b>	Latex, Solvent, Eco-Solvent, UV Curable

For best results, utilize ORAFOL ICC profiles available at [www.orafolamericas.com](http://www.orafolamericas.com) and allow solvent-based inks to dry for at least 24 hours (48-72 hours preferred) at 70°F before cutting the graphic to the ink or applying a laminate.

\*average

\*\* in original packaging, at 68°F and 50% relative humidity

\*\*\* standard central European climate

## Note

Surfaces to which the material will be applied must be thoroughly cleaned from dust, grease or any contamination which could affect the adhesion of the material. Freshly lacquered or painted surfaces should be completely cured. The compatibility of selected lacquers and paints should be tested by the user, prior to application of the material. Films with structured surface are naturally more sensitive than the unstructured. Accordingly, these films are to be treated carefully both in processing and in cleaning. Impurities affect the appearance of structured films and require more frequent cleaning. Furthermore the application information published by ORAFOL is to be considered. The batch traceability according to ISO 9001 is possible on the basis of the roll number.
